

Low Cost High Quality  
**Solenoids, Electromagnets & Driver Electronics**

Made In USA

ISO 9001:2000 Certified

**Stock and Custom**

**Tubular**

High Force. High Reliability. Long Life.  
Suitable for use in a variety of applications.

**Open Frame  
(C, U, D & Box Frame)**

Low Cost. Medium Force. Long Life.

**Low Profile**

Highly efficient in short strokes. Low Energy  
Consumption. High Speed.

**Hinged Clapper**

Low Energy Consumption. Low Cost. Short  
Stroke. Low Force. High Speed.

**Latching**

Momentary Pulse to Pull or Push.  
Zero Power Consumption for Holding.  
Bi-directional motion is possible.

**Rotary**

Quiet, Smooth Operation. Long Life.  
No axial shaft movement. High Speed.

**Custom**

Designed to customer specifications to fit the  
application.

**Electromagnets**

Highly Efficient. Fast Action. Low Energy  
Consumption. Metal Housing.

**Driver Electronics**

Drives solenoids and electromagnets to  
reduce heat generation and can vary and  
control the input voltage to devices.

May be triggered with a low voltage such as a  
TTL compatible signal.

Call for our brochure with design guide or visit our web site for our complete catalog and price list.

**On-line purchasing available.**

**Immediate shipment.**

## Background and Experience

Magnetic Sensor Systems (MSS) designs and manufactures high quality solenoids, electromagnets, driving electronics and other types of electro-mechanical components for a variety of industries and applications.

Established in 1983, Magnetic Sensor Systems is headquartered in Van Nuys, California, USA. The proximity of Magnetic Sensor Systems to both the major airport and seaport facilities of Southern California makes service to international customers very expedient without any freight forwarding or time consuming difficulties.

Through wise and aggressive use of its resources and technology, MSS has become one of the world's leading solenoid manufacturers with a global customer base.

## Global Delivery

We serve global customers on a worldwide base. A truly global Company, we are committed to maintaining and developing our international sales and supporting a diverse client base.

This comes through our wish to ensure all orders are dispatched and delivered across the world with the shortest delivery time, in most cases within 1 to 5 days.

To make all of this possible required pre-negotiated and deeply discounted rates from major carriers such as DHL®, FedEx® and UPS®.

DHL®, FedEx® and UPS® are registered trade marks of DHL International LTD, Federal Express and United Parcel Service of America respectively.

## Headquarters/Manufacturing Plant

## Immediate Shipping

All products are available for immediate shipment. That is all solenoids and electromagnets presented in our catalog for all listed voltages, duty cycles and gauges, with all listed supporting electronics and hardware.

This shorter delivery cycle will enable Magnetic Sensor Systems' customers to shorten production cycles and implement just-in-time manufacturing.

## Quality Policy

The management and employees of Magnetic Sensor Systems are committed to meeting or exceeding our customers' quality expectations and industry standards throughout the design, manufacturing, service and technical support phases. We will continuously improve our methods and the quality of our products and services through innovation, research and development, ongoing review, training, maintenance of a safe workplace, and the treatment of all with respect and dignity.

## Off-the-shelf or Custom

Magnetic Sensor Systems has an extensive family of standard products in variety of sizes and shapes ready to be shipped immediately from stock.

Where standard products are not quite right for your application, a competent staff of highly trained design engineers is always available to develop custom solenoid actuators, electromagnets and related products to be manufactured to any size or configuration. They also work with the customers' design staff to complete or augment any design already in process.

We also build complete value-added sub-assemblies with many levels of complexity.

## In-house Manufacturing

Part of Magnetic Sensor Systems' competitive advantage is its state-of-the-art in-house manufacturing facility in North America combined with offshore manufacturing capabilities. Highly controlled processes, committed staff and extensive testing complement our product design strengths. This enables Magnetic Sensor Systems to supply the most demanding of clients from specialized small orders to high volume just-in-time deliveries. Magnetic Sensor Systems is ISO 9001:2000 certified.

## Sales and Distribution

Magnetic Sensor Systems generally sells direct or through distribution partners, depending on the product in question. Please contact us to establish how best we can supply your needs.
